

# Rack mount installation

## Midra™ 4K units

One rack kit is supplied with the device: Front ears (Ref: 180534)

*(Compatible with the following devices: Eikos 4K, Pulse 4K, QuickMatrix 4K and QuickVu 4K)*

### CAUTION!

- Mounting using only the front rack ears is sufficient for fixed and mobile installations. Make sure to provide an adequate ventilation for the device. When installing it into the rack, make sure no ventilation holes are blocked. The air intakes by the front panel and exhausts by the back of the unit.
- If required, front handles of the device can be dismantled, but with caution. The removed screws must not be reintroduced to their location without handles in place. Substantial damages can occur, including risk of electric shock from the mains voltage.

### To install the front ears:

1. Screw the ears on each side of the device using two M4x10 screws per side (M4x10 screws included in the package).
2. Place the unit into the rack and screw the ears on the rack (screws not provided).
